Wallarrah 2 Coal Project-Support of Project Submission

As a director of the above company, I am in full support of the above project, and for the following reasons believe Wallarah will support local community:

- Local employment for the Wyong and surrounding shires. With the down turn in the resources sector, this project will provide much needed employment opportunity
- Local business support : Small business has a lot to gain from this project in many ways
- Income injected into the local community
- Training and development for new candidates into the mining sector

Yours faithfully,

Garry Manwarring

Director
