Subject: Kores model submission

I have just read a model submission against the mining of coal under my house at Jilliby. It is a scholarly document which expresses for me the dismay I feel. I am not able to produce the facts and figures therein. Ordinary people can only rely on the politicians who govern us. All I know is that Barry O'Farrell promised us at a public meeting before he was given a mandate that he would stop coal mining in our valley. All I know is that coal mining in a rapidly expanding highly populated area is an obscenity. He is condemning the people of the central coast to live with water and air pollution, to say nothing of huge coal trucks and mining paraphernalia clogging our already insufficient roads. Good government planning would surely keep heavy industry out of water catchment areas. What are you thinking of? This is a dormitory area for Sydney. Don't let our workers live with coal dust. You can dig for coal elsewhere. We have more than enough coal in a world that is changing. Do not spoil what we have left.

One voice crying in the wilderness,
Rae Davenport
12 Dunks lane
Jilliby.
