Objection to proposed Wallarah 2 Coal Project – Application No. SSD – 4974

Dear Sir/Madam

I am writing to object to the above application. I am most concerned about the impact Of this mine beneath our Drinking water catchment. This mine can only damage not enhance Our quality and quantity of drinking water.

The Central coast is one of the state's fastest growing regions. All water catchment areas must surely be preserved for our expanding populations future water needs.

Only harm can come from this type of long wall coal mining under residential properties.

Yours faithfully
