Objection to Proposal - Wallarah 2
Coal Project Application No SSD-4979

Dear Sir/Madam,

I would like to strongly object to this proposal on the grounds of the unacceptable risk to our water supply, the risk of adverse health effects from $< 2.5\mu\text{m}$ particles in the atmosphere, and the fact that this mine will be situated within 5 km of one of the highest growth areas in NSW.

Kores state that as a minimum this mine will directly cause the death of 1 in 100 000 people. This is unacceptable and does not take into account the number of people whose health will be adversely affected.

Please do not allow this proposal to proceed.

Regards,

Megan Blake 19 June 2013.
