Director
Mining Projects Development Assessments Systems and Approvals
Dept. of Planning and Infrastructure
Sydney

Dear Sir /Madam,

We are writing to your department to register our dismay and concern over the proposed Wallarah 2 Coal Project in the Dooralong and Yarramalong valleys.

We have recently moved from Sydney to this wonderful part of the Central Coast and cannot comprehend how this project can possibly be under consideration by your government when prior to being elected your promise was NOT to go ahead with it.

Apart from the environmental damage and the diseases associated with this type of mining (which are now coming to light) the monumental risk to the underground water supply should be sounding alarm bells!

The people of the Central Coast care about their community and no amount of money paid to sporting associations and clubs etc will buy their support for this "project".

We have not spoken to one resident that supports the Wallarah 2 Coal Project and we definitely do not.

Yours faithfully

Dianne & Stephen Loader
