Major Planning Assessments

Dept. of Planning & Infrastructure

Dear Sir / Madam,

We are residents of the Yarramalong Valley & welcome the opportunity to comment on the proposed policy re the Kores Coal Mining application.

Please note that 'nature' always fills a vacuum!

Water always finds its own level!

Your government will be left with a lot of explaining to do when

300,000 people living on the Central Coast have serious water availability problems, because someone sitting behind a desk somewhere in Korea have decided to "risk it."

Yours sincerely,

 S. Kerkhoff.

GERARD & SANDRA van KERKHOFF.
