I live at 11 Daintree cres Blue haven NSW. 2262 and I am opposing this project which is going to effect the quality of air and supply of water that we drink through our system daily.its going to affect all of those people that have problems with breathing namely asthma and so on..I don`t think that its fair that this type of exercise is allowed to go ahead.
we as rate payers have a right to voice our opinions.
In life there is more then just embarking on a journey in order to fulfil somebody`s dreams .
There has to be another way to sort this out, instead of making a wild decision and hurting people along the way....
I do not approve of what has been thought of to do.....sighning off from a concerned rate payer.....mr Giuseppe Amato,....
