Wallarah 2 Amended Development Application
(DA No. SSD 4974)

I wish to strongly object to the above
Application.

This will effect so many people on the
Central Coast due to destroying and poisoning
the land, the water, the environment.

The Central Coast area is a very important
area, being a food bowl.

No matter what so called precautions are
put in place, there are always incidents and
accidents.

It is not worth the risk to destroy the food
and water supply of the Coast.

This will effect so many people and end up
costing the economy more with less food
and tainted water and probably more
illness, then affecting the hospital system.
The State Government said this would not
be approved. Are they lying to the people
of New South Wales?

... Roe Davies.
