Mr Robert and Mrs Jean Madden.

■ Lytton Road.

Moss Vale. N.S.W. 2577.

Moss Vale Plastics Recycling Pty Ltd.

Application No: SSD-9409987.

We wish to state to you we are fervently OPPOSED to this proposal ..

Even though we are ardent recyclers ourselves we feel here the ends do not justify the means...to have recycled plastic at any cost to the environment and peoples well being and threat to the Highlands doesn't add up.

We object for the following reasons.....

1. People visit the Highlands for its fresh air and a country escape.
2. Threatening people's homes breeds anger and panic.
3. It is not a suitable place to have such a threatening factory.
4. AIR POLLUTION from the factory and semi-trailers coming to the sight.
5. NOISE POLLUTION caused by trucks and factory.
6. THREAT TO HEALTH by obmissions.
7. PEOPLES WELL BEING compromised for CHINESE PROFITEERING.
8. There surely is a more suitable place for a factory of this type away from homes.
9. There are many elderly living in the Highlands with lung problems and others with asthma
10. This proposal is causing undue stress to manywhy do we have to fight for what we have worked hard to achieve for a peaceful healthy lifestyle ?

We are retired elderly people who love our life in the Highlands, please say no to this proposal....surely you would conceive yourself that this is not a suitable sight for such an operation.

We implore you to put your people of NSW first and take this factory away from towns and homes (not just the Highlands)

Would a better idea be to stop the imports of inferior plastics made up into inferior products causing plastic pollution in Australia.

Yours Sincerely J Madden *Th L Madden*
