

A SUBMISSION BY MAEVE FRANKLAND  
**OBJECTING** TO THE PLASREFINE PROPOSAL

" I don't want the factory because it could make all the animals sick. Also the land is very lovely and the trees could die because of the pollution. All the trucks will go 'beep beep beep' and disturb all the people. And the beautiful houses will get all the smoke in their backyards where the kids play. Please don't put a factory near my home. It's not good for nature and the environment. "
