Hi Peter,

That's incorrect, the traffic report submitted does not highlight the changes that were proposed at the meeting held with RMS and the consultants. Some of the notable changes were that the Fisher road access was to be left-in left-out with the median separation and access from the main gate entry was no longer being proposed with a T-Intersection type treatment bring the final layout. The report and plans show that there is an exit only from Eastern Avenue, which is the main entry gate and that's to be completely closed as per the updated information.

A detailed CTMP is to be submitted with the access routes and methods undertaken. At the meeting there was discussion regarding larger vehicles existing on to the middle of the intersection which was a concern from RMS and consideration was to be given once a detailed CTMP is provided.

The applicant was to contact the panel members involved with the works being undertaken on City Road/Butlin Avenue intersection as part of the Sydney Uni proposal. This included the pedestrian crossing across City Road. RMS Traffic Engineer had also provided detailed works being undertaken at the intersection to the representatives at the meeting which was noted.

I do need to provide the contact details of the panel members to the consultant however, the traffic engineer is not in today and has the details.

RMS is happy to provide a response via the Response to Submissions stage in regards to the updated information. Therefore, the updated information is to be submitted to RMS was review prior to a formal response being provided regarding the subject development. These comments can be taken in response to the above subject submission.

Regards,
