Re: Smeaton Grange Resource Recovery Facility
Application Number SSD 7424

OBJECTION LETTER

The reason why ^{we} object to the proposal is because we live at the street closest to the site. If you were to approve this Resource Recovery Facility also known as a garbage tip then it will be too close to our home. I am sure at some moment in time we would be affected by the dust, litter, pests, noise or smell. If this were to occur we would contact the EPA and applicant would get fined for a breaching a condition of consent. Then what?! We repeat that process for the next 20 years? Please do not approve this proposal to begin with.

^{we} "I declare have not made any reportable political donations made in the previous 2 years"

^{we} "I do not want my name published in the list of submitters on the departments website, please write "Name withheld on request".
