I totally object to the Benedict Resource Recovery facility being set up in Smeaton Grange as proposed. I have major concerns that this facility is so close to our residential area and especially basically being redacted. The amount of heavy traffic is bad enough in this area now without increasing to cater for this facility.

I have a redacted with a vast amount of wild life and I believe the noise and air pollution will have a large effect on this.

I am also a redacted and as everyone knows noise carries at night which I know will impact on my redacted. I also redacted and have concerns the pollution from this facility will have adverse affects on my health.

There are large number of childcare facilities within this area and I believe that pollution created by this facility will detrimental to the health of the children attending these childcare centres including redacted.

I chose this house because of the quiet surroundings and feeling of being close to nature. This facility will remove all that and more and must not be allowed.

Regards

Redacted
