Dear Sir/Madam,

I would like to offer my support for the Rocky Hill Coal Project.

The increased wealth of the town's people, with the income of 73 direct jobs during mining operations and with a flow on effect of further indirect jobs within the community. The direct spending of Rocky Hill Coal within the towns businesses will have a dramatic financial benefit to the town and its businesses.

The injection of wealth into the Community will create a considerable decrease in social welfare/mental health issues associated with unemployment and low income, such as domestic violence, depression, alcohol and drug abuse, break, enter and steal crimes, and petty crimes associated with minimal income.

The injection of 0.50c/tonne production related Community Grants Program is also a huge benefit to the local community groups, many of these groups are able to "Value add" to funding for Community programs and projects, expanding on this initial funding threefold, increasing the projected \$400,000.00 to approximately \$1200,000.00 value being injected to community wellbeing projects annually.

The increased rates payable to our new Council, of 5.6 million will assist the entire community as will the upgrade works for bridges and roads to be undertaken by GRL as documented.

The Management of Gloucester Resources Limited, and the Rocky Hill Coal Project have made an undertaking to manage tours and viewing platforms of the mine to bolster the town's tourism industry.

So in closing, I can only find benefits to the Rocky Hill Coal project for Gloucester, so I would like to say in closing, BRING IT ON!

Thankyou for the opportunity to comment on the project.
