I OPPOSE THE ROCKY HILL COAL PROJECT

To whom it may concern,

Regarding the ROCKY HILL COAL PROJECT – Application No.SSD5156

This letter is written to oppose the Rocky Hill Coal project and I have not made a reportable political donation of any kind.

One of the reasons my family chose to buy and build in Gloucester is because I have a medical condition called Neutropenia and the clear country air is a good thing for me and the rest of my family.

We are terribly horrified to hear of the plans for an open cut coal mine so close to the town and very concerned that the close distance and impact of prevailing winds has not been adequately considered in terms of the health impact of those in the town of Gloucester.

The impact on me due to my medical condition causing me to have a suppressed immune system is likely to be significant; I also have elderly relatives who visit with us. Our home in the country has been a haven for us and our friends who come visit and I believe you are damaging the environment with little concern for those who have chosen to reside and invest into the community life of the town.

Please reconsider this venture for the sake of those who live in Gloucester and those who visit this beautiful part of the world.

Yours sincerely

Sam Henry
