**Submission for the Rocky Hill Coal Project – Application No SSD-5156**  
**Stratford Coal Extension Project – Application No SSD-4966 MOD 1**

Dear Sir/Madam

I oppose the Rocky Hill Coal Project and the Stratford Modification

One would have to ask, why would the NSW Government justify a green field coal mine just 900metres from a residential area. Gloucester is an area of rural beauty, with sustainable industries of tourism, dairies and cattle farming. Not the place for a coal mine.

Even coking coal is not in demand around the world. There is enough stockpiled to adequately supply the steel making industry. Coal mining is not a sustainable industry, with fluctuating prices and worker layoffs.

The benefit to the NSW Government and the people of NSW is debatable. GRL will pay \$63M in revenue and \$60M in taxes. The life of the mine is 16 to 20 years. That means the company is paying just over \$3M a year for revenue and taxes. Most of the profit from this company will go overseas.

The NSW Government needs to invest in renewables, particularly in rural areas where employment is low. Towns, like Gloucester could be embracing the new world of solar, thermal solar, biomass, wind and hydro. So many options with huge benefits, like, reduced carbon emissions, lower power bills, regional economic development and stable job creation.

Gloucester could be the new renewables hub instead of following an out dated industry like coal. Isn't it about time we followed the rest of the world into the 21<sup>st</sup> century?

In addition, I wish to add that I find the prospect of this mine ethically + morally + environmentally unjustifiable. It's time to wind down this industry! Climate change is wreaking havoc with ecosystems + lives now + if the coal mines such as this are open, well only be exacerbating the problem. Please do the right thing by the next generation.

Yours faithfully  
Carol Archer
