Re: Submission for the Rocky Hill Coal Project -
Application N° SSD-5156
Stratford Coal Extension Project -
Application N° SSD-4966 Mod 1

Dear Sir,

Full and passionate opposition is my response to
both of the projects listed above.

They will seriously and economically impinge on
the areas scenic and prosperous amenities.

Both locals and visitors will avoid the noise,
dust, diesel fumes and truck movements on
narrow, rural roads.

Another major concern is the exacerbation of
health issues, particularly for the lungs and hearts.

My partner and I visit Gloucester frequently
and we are appalled at the proximity of
the mine to the vineyard we visit with its
healthy rural ambience.

The area needs to enhance rural livelihoods such as farming, cattle and tourism.

For the sake of Gloucester residents and visitors, please review these projects through extremely critical eyes, and make the correct decision for the economy AND the environment!

Yours most sincerely

Ron Britton
