Re: Rocky Hill Coal Project - Application No. SSD-5156
Stratford Coal Extension Project - Application No. SSD-4986 M&P
Dear Sir / Madam

I am opposed to the Rocky Hill Coal Project and the Stratford mine modification.

We are visitors of Glendale, the beautiful environment attracts us to visit here quite often in the past 3 years. We are worried that any mine to be built within 900 metres of 30 homes and families would devastate the health of people. There are other ways to generate power, such as solar, biomass, wind and hydro. Glendale attracts many tourists with its natural beauty. Please do not damage natural environment and people's health and reserve the good lifestyle for the future generations.

Yours faithfully

2nd, Oct 2016
