Preferred method of contact: ☐ Mail ☐ Phone ☐ Email

## Nature of Request

### **Please Note:**

Please provide detailed information describing your development as attachments to support your request including harmonic loads, excessive motor starting or other types of load that may cause quality of supply issues on the network.

The Customer/Developer is the Landowner: ☐ Yes ☐ No  
☐ I am authorised by the customer/proponent to make enquiry to Endeavour Energy for this development.

## Important Information

As fees associated with normal applications for connection services represent a more cost effective solution, final connection customers are not encouraged to apply for technical reviews unless their projects are staged or of a complex nature, or a review of supply availability is required and application is not possible.

This form is used for both Complex and Simple requests for technical review, which are also called Complex and Simple preliminary enquiries, and must be accompanied, with a cheque made out to Endeavour Energy for the fee amount as shown below. All payments are non-refundable, and are unlikely to substantially reduce other fees associated with submission of applications, as the same information must be reviewed and refreshed in the application phase. The quoted rates below are based on the AER approved fees – Simple Enquiry \$101.43/hr and Complex Enquiry \$240.26/hr including GST.

**Complex** requests for technical review require input from Network Planners and specialist project management services to determine the voltage of connection and/or the connection point and result in a detailed response. An application for connections services is still required in order to receive a binding offer and proceed to connection.

Common types of complex requests for technical review	Minimum Hours	Excluding GST	Including GST
Master Planning with Transmission	11	\$2,402.60	\$2,642.86
Master Planning without Transmission	9	\$1,965.76	\$2,162.34
Subdivision up to 300 lots	5	\$1,092.09	\$1,201.30
Connection of Load at LV	5	\$1,092.09	\$1,201.30
Asset Relocations without Transmission	5	\$1,092.09	\$1,201.30

**Simple** requests for technical review are basic reviews of existing data systems in order to provide a summary response. An application for connection services is still required, in order to receive a binding offer and proceed to connection.

Types of Simple requests for technical review	Minimum Hours	Excluding GST	Including GST
All simple	1	\$92.21	\$101.43
