Attention: Postal Address:	Director, Metropolitan and Regional Projects South Major Projects Assessment Department of Planning & Infrastructure
	GPO Box 39, Sydney NSW 2001
Email: Fax:	plan_comment@planning.nsw.gov.au (02) 9228 6455
Applicant:	M&L Development Co Pty Ltd
Name of Proposal:	Four Points by Sheraton Hotel Expansion incl. commercial office space
Application number:	4972-2011
Subject of Submission:	Objection
I object to this proposal because	se:
My home will lose wint     My home unit will lose     It will have a significant     It will create a canyon v     It will create a wind tur     I will lose my view of w     I will lose sight of my ic     As a traffic generator w     time for vehicular acces     It will be a traffic gener	Ill be felt 24/7 as a neighbouring resident and not as a 9-5 office worker the sun hence my energy bill for heating & artificial light will increase direct sun and I will suffer reduced opportunity for Vitamin D production to aural and visual impact on my lifestyle.  With traffic noise 'echoing' off the building surfaces annel, channelling in wind born dust and allergens, especially from the West. Fater and greenery and the 'boxed in' feeling will impact on my mental health. Sonic weather vane, the Bicentennial flag pole in Darling Harbour without offsetting infrastructure, the increased traffic congestion will increase the ses and egress to my home (ignoring temporary road closures). Fator and only add to the existing traffic congestion in the city. It will exacerbate traffic noise and exhaust fumes, impacting on my health eat offering soft targets
2. Building impacts	
☐ The proposed (RL 94m)	tower is too high and too close to the foreshore and in any event, should be
stepped away from the	
supply of office space to	y tower includes 7 levels of office space that will compete with the abundant o be generated in nearby Barangaroo
Removal of these 7 leve	els above the 18 hotel levels would not impact hotel functionality
A revised 17 storey tow	er (RL 66) would match the height of the existing hotel structure
I he tower conflicts with	h clauses 25 & 26 of the Sydney REP – its cumulative impact will be detrimental to
The tower has a high vis	terways and adjoining foreshores and views sual impact – its overbearing vertical form and scale will obscure views to the
harbour and landmarks	and adversely impact on the amenity and visual qualities of the area
☑ There is no provision for	r on site parking for guests and staff
3. Construction impacts  The stated objective of	night work between 21:30 and 5:00 is to mitigate the extent of traffic disruption &
road closure, <b>not</b> reside	ent sleep disturbance
Night works including p	ile driving, will generate 24/7 noise and vibration giving no relief to occupants of
■ No consideration has be	ll buildings for the duration of construction. een given to the impact of sleep deprivation and the potentially fatal associated
I to the total and the total a	- Page 11 and the potentially later associated

## 3. Heritage & public interest

health imposts on residents

☐ There is a net loss of soft surface and greenery

Its 'heritage interpretation strategy' will overwhelm the 2 storey heritage street-scape in Sussex St

$\boxtimes$	"During the preparation of the EIS" the proponent failed to consult with community groups & affected
	landowners as stipulated in the Director General's Requirements.
$\times$	Also, the EIS has failed to describe the consultation process
. 🛛	The proposed tower is not in the public interest because it takes much and gives little in return; it takes
	away the views of others but does not create any, it utilises existing car spaces but does not add to sup
	it removes trees without regenerating more and the amenity provided to guests and staff is dwarfed by
	the loss of amenity of others
4. Fina	
	Loss of primary views to waterfront will significantly impact the value of my home.
	It's not fair - the hotel will gain financial advantage by charging guests a room rental for the view, SHF/
,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,,	will get a rent increase on its land but I will not receive compensation for amenity loss.
X	The EIS has failed to demonstrate that a bigger/better hotel will generate a net benefit, given the
	enormous loss of amenity to the surrounding community
	Insufficient evidence is given to show that (1) the Sydney Tourist market needs another 330 hotel room
	or if it does, (2) that those rooms must be on this site to the exclusion of all others
	ort by GM Urban Design & Architecture Pty Ltd (GMU) — submitted as part of the EIS
X	In respect of The Berkeley, this report is false, misleading and fails to meet the Director General's
	Requirments on visual impact. The author can't even get the street address right.
¥	This report incorrectly concludes that there is minimal loss of view, because It totally ignores the west
	aspect of The Berkeley, the side with the most to lose – ie immediate views of the harbour, iconic
	elements like the Australian National Maritime Museum and its floating exhibits
X	It makes a flawed conclusion about private views from the 128 apartments in The Berkeley, based on a
	'desk top study' & modelling, without site visitation or consultation with residents.
	a modelling, without site visitation of consultation with residents.
X	The authors have failed to undertake mandatory consultation with stakeholders
X	The authors have failed to undertake mandatory consultation with stakeholders In respect of the Astoria Tower, on page 11, GMU makes a strange unprofessional assumption – because
