Re: Watermark Coal Mine
App No: SSD-4975 Watermark Coal Project

Disclose reportable donation: We have not made a reportable political donation.

Privacy Statement: I have read the department's Privacy Statement and agree to the Department using my Submission in the way it describes. I understand this includes full publication on the Department's website on my submission, any attachments and any of the personal information in these documents and possible supply to third parties such as state agencies local government and the proponent. I agree to the above statement.

Submission:

We are mail Contractors in the Breeza/Curleris Area and are farmers 2 Kilometers from Curleris.

Our Concerns are: Our Objections are:

Traffic:

Proposed road closures will impact on Kilometers travelled if our run is reduced, who will subsidize us. Road dust will also be a factor and a very big hazard for us as we have already experienced this with the exploration teams.

Train Movements:

We negotiate Ten Rail Crossings per day as we have a time schedule to uphold this is a concern also the Coal dust from these Trains/Tracks so how do we avoid this problem.

II

Koala and all Native Animals:

Contaminated drinking water and dust on leave will severely reduce these numbers who is going to monitor the Health of these beautiful animals, as for relocating, Koalas are Terrestrial

Air Pollution:

We are west of the proposed site and are concerned with the quality of air we will breathe our Cattle's health and coal dust contaminating our grain, we need to know the effect this will have on our health

Water:

Our tanks are our only source of water so can only imagine what we will be drinking who will be testing our water and if unsuitable for Human and Animal consumption what is the remedy to the situation.

Heritage:

We strongly disagree to the desecration of Heritage sites Aboriginal or not, looking at beautiful rock formations taking millions of years to evolve gone in one blast is just so so sad.

Where are the caretakers of the vacant property to treat and maintain them as their own.

Ecology Vegetation:

Purchasing of Properties with established Trees/Vegetation does not offset the Trees/Vegetation destroyed in the mining process. We need permission to clear land which is often declined who gives mines permission
