- Advice & Consulting

10.12.2013

To Whom it may concern, this company employees approx 20 employees at this time, and has been involved in some form within the coal mining industry for the past 50 years.

The company have a reliance on continued operation of the industry in this area for our contract work involving our staff employment income and prosperity.

We have traditionally employed local people in our business to achieve quality results for our company, and satisfaction of serving our clients to the best of our ability.

The people we employ have relied, and continue to rely, on us for continued work to sustain their employment and income.

We in turn rely upon the client to continue to mine coal to sustain our turnover to achieve those outcomes.

Local businesses rely upon our trade to support their businesses

During the time this company has been involved with the Mandalong mine there has been a great business relationship and ongoing work over the years through our services to the mine and exploration works..

Mandalong have always shown themselves, and require their staff and contractors, to be responsible in all aspects of the operation from water resources, land management, environmental impact and community relationships, and Cultural heritage.

We understand that Mandalong have a proposed mine extension that will extend the life of the mine until approx 2035. We believe that approval of the extension would be of great benefit to the community at large as well as to our company.

The local community will continue to benefit from employee wages being spent locally, as well as donations of both time and dollars to sporting and community groups.
