I object to the proposal.

My submission supports the views of [REDACTED] [REDACTED] [REDACTED] submissions which I have read.

My other reasons for objecting to the proposal are as follows.

I am witnessing first hand the devastation the mining activities from the present mine has caused to agricultural land, Business, loss of jobs and income, the environment, subsidence troughs and ponding also the personal toll, heartache, despair and expense to my parents and our family which is just not fair and equitable. I would not wish this devastation to be inflicted on any other family I object to the proposal.  
Our Intergenerational equity is lost.

I have tried to understand the technical and other data presented in the EIS  
I am requesting a Commission Of Inquiry into the proposal.
