

## ATTENTION : DIRECTOR INFRASTRUCTURE PROJECTS

Allan and Carolyn Cameron ( [REDACTED] )

"Highfield"

35 James Creek Road

James Creek 2463

Thursday 14<sup>th</sup> February 2013

### SUBMISSION: WOOLGOOLGA TO BALLINA PACIFIC HWY UPGRADE- SSI-4963

I support the project in the main but wish to register my concern re:- Position reference No 13, Section 5

"Highfield"

James Creek Road

James Creek

I am concerned about our heritage home, started 1917, finished 1920 (No 13 in Section 5 Pages 70 and 271 of 390 in the Historical Non Aboriginal Heritage Document FINAL) The house is built of bricks using lime mortar and is plaster lined.

As we know from renovations in the past, the bricks and plaster are delicate and could be subject to damage by vibration.

The house is on a hill overlooking the existing bridge and on the same geological layer that dips down under the highway road. We have recently felt the house shake during road works on the clover leaves, particularly vibrating rollers.

The EIS and Final document states that we will not be subjected to vibration problems, but I wish to register my concerns that it may.

I have photographed every wall, inside and out for future reference.
