Dear Sir/ Madam

SPPRINGVALE EXTERNSION PROJECT – PRODUCTION INCREASE MODIFICATION

Operating for 20 years (established in 1995), Springvale Mine is an underground coal mine in the Lithgow area supporting a workforce in excess of 300 people.

Springvale is not only a significant local employer, it is a major contributor to the Lithgow community and the only mine capable of supplying coal to Mt Piper Power Station, also a significant local employer, which in turn provides electricity to 15% of the state.

The modification is seeking to increase the cap on Springvale's workforce, increase coal production limits and increase the coal stockpile capacity. It is not proposing any changes to the approved longwall mining technique, the approved mine plan or existing surface footprint. Also importantly, any potential impacts from an increase in production will remain within Springvale's current planning approval.

We support this modification and understand it will allow Springvale to benefit from any future production efficiencies and respond to any uplift in the coal market.

Yours sincerely
