

Hi Diana

I refer to your email dated 20<sup>th</sup> September 2017 regarding the Exhibition of the Yass Valley Wind Farm MOD 1 (SDD 6698) and accompanying information.

The Environmental Assessment Report (EAR) and application detailing the proposed modification has undergone review. The EAR appears to comprehensively address any potential public health issues, particularly in regard to noise and shadow flicker. The proposed monitoring, controls and mitigation measures for affected properties appear to be adequate, noting in particular the proposed controls in regard to noise encountered at Receiver C04.

Provided the proposed modification complies with the submitted EAR, this office would raise no objection to the proposed modification.

If you require any further information please do not hesitate to contact me.

Kind regards

**Tabitha Holliday**
