RE: SSD 7462 – 13 Pembury Road Minto

Dear Sir / Madam,

I am writing to object with everything I have about this proposal to expand the capacity of this waste station.

I have owned and still own, a property in this street for over 30 years and Campbelltown Council made it difficult to develop anything unless it was of good quality which resulted in a quality industrial area. Now all that planning is going for nothing with developments such as this being submitted.

This development is going to severely downgrade my life investment.

Regardless of whatever submission they make, to think they can process 7 times more waste is preposterous. They are a big enough nuisance as it is without multiplying that x 7.

The difficulty in negotiating the street is hard enough as it is without multiplying the number of trucks entering and leaving the site.

The street just does not suit high volume truck movements.

I trust you have the common sense to see through the submission for what it is and think of the surrounding property owners and reject this submission

Yours Sincerely

Chris Firth
