Subject: Attention:Director, Infrastructure Projects

Dear Sir,

Fanny Lai
5 Norma Cr
Cheltenham

Application: Objection to EIS2
Application no: SSI-5414

I oppose the arrangement of having to change three time from my station to City through the new Direct Rail Link.

This is not a viable and fair treatment to the residents in the northwest areas where have suffered from the noise and make our life more difficult. What is the point of advance traffic system that create inconvenience to people who utilise it? It is a step backward service and not worth our support.

Please hear our voice,.

Regards,
Fanny
