Attention:Director, Infrastructure Projects; NorthWest Rail Link Submission;
Objections to the NWRL EIS2

Dear Director, Infrastructure Projects,

I wish to make this submission, that the people of north western Sydney with their north west rail link - it should right through into the city and not stop at Chatswood.

Its stupidity for this service to end at Chatswood and not go all the way into the city.

All the future users from Sydney's north west would either work in Chatswood, North Sydney or in the city.

The North West Rail Link must go all the way into the city and a second tunnel cross for trains/buses must be constructed, as a coinciding vital piece of infrastructure.

Should the current Liberal State Government with Planning NSW not review this and come to common sense, by having the north west rail link go all the way into the city -

Then this will surely be a election issue in 2015 with the Labor opposition looking at gladness, over Gladly (NSW Transport Minister), similar way Bob Carr did with the 1991 state election.

Hope and pray that common sense prevails.

Yours faithfully,

Paul McKenzie
