**Subject:** Objections to the NWRL EIS2

---

12<sup>th</sup> November, 2012

**Attention :** Director, Infrastructure Projects

---

**Name :** Mr Agnelo Correa

**Address :** 135 Murray Farm Road  
Beecroft NSW 2119

**Name of application :** Objection to the NWRL EIS2

**Application number :** SSI-5414

**Objection :** I absolutely object to the NSW Government proposal for the Epping to Chatswood Rail Line to be changed so that it will only run single deck trains between Epping and Chatswood.

**Reason for objection :** We currently travel from Beecroft to the City via Chatswood, a journey of under 19 km, on a single train. If the above plan to change the Epping to Chatswood Rail Line to run only single deck trains goes ahead it would mean we have to catch three trains to complete the same journey. This is absolutely ridiculous.

Who suggests such stupid plans and who approves spending of public money for such an illogical decision? Mrs Gladys Berejiklian seems to be managing plans for a rail line that is going nowhere very quickly. If this plan goes ahead, Mr Barry O'Farrell or the Liberals will never get my vote ever again. I am sure there are countries in the third world that would put better plans in place with the same amount of money.
