Application to Object the EIS2

Name: Georgia Tafe

Address: 25 Tobruk Ave Carlingford Sydney 2118 NSW

Application Number: SSI-5414

I object the proposal. Epping station in peak hours is crowded and parking at the station to catch the train into the city is at least a kilometre away from the station. I use Cheltenham station as a direct link to the city as there is more parking available unlike at Epping Station. I am at Cheltenham station everyday in peak hours and have been for the past 6 years and it is used by the elderly, school children and families for easy transport and minimising the amount of cars on the overcrowded roads to the city. Travel times will increase meaning it will be harder to work in the city for people living in these areas and also a decrease in property prices in the suburbs surrounding the stations such as Cheltenham and Normanhurst. Stations such as Cheltenham hold great heritage in the area as the station was the reason the suburb evolved around it. Please reconsider your actions.

Kind Regards,

Georgia
