More trains, More choice for Sydney's North West

Metro style trains to replace heavy rail on NWRL

Artist's impression: A single deck, high frequency train.

What has not been said there will be?

**MORE changes
MORE standing
MORE time to destination
MORE passenger congestion
MORE inconvenience**

If you are happy with this **DO NO MORE** - If not **YOU CAN DO MORE**

See other side

On the 29 October 2012 the NSW Government released the Second Environmental Impact Statement (EIS2) for the North West Rail Link (NWRL)

How it will affect local residents:

- Passengers travelling on the Northern Line from Beecroft and Cheltenham, who currently enjoy a direct run into the city on one train, will be forced to **change at Epping** for a single deck train. At Chatswood, they will have to will then need to **change again** back to a double deck train to get to the CBD.
- That means having to get **three trains** into the city increasing travel time by 15 minutes rather than the one seamless system they enjoy now.
- The introduction of this incompatible component is unacceptable.

Minister Berejiklian has stated that this will create great disruption for commuters on the Northern Line.

The NWRL is a much needed project for Western Sydney but it should not be a metro line. The distance is far too long for metro style transport. **The tunnels should be built large enough for current double deck trains to allow its integration into the current rail system.**

Lodge your objection to EIS2 by December 3 2012.

Name & Address. Ashish Nangia

527 Pennant Hills Road, West Pennant Hills 2125

Application number SSI-5414

A brief statement (in support of your objection to the proposal)

I do not agree with this setup as it is going to
cause more inconvenience to all commuters travelling to
city.

Your reason(s) (for objecting to the proposal)

New Infrastructure is put in place to ease life of
commuters instead of making it an in-convenience.
