

On the 29 October 2012 the NSW Government released the Second Environmental Impact Statement (EIS2) for the North West Rail Link (NWRL)

How it will affect local residents:

- Passengers travelling on the Northern Line from Beecroft and Cheltenham, who currently enjoy a direct run into the city on one train, will be forced to **change at Epping** for a single deck train. At Chatswood, they will have to will then need to **change again** back to a double deck train to get to the CBD.
- That means having to get **three trains** into the city increasing travel time by 15 minutes rather than the one seamless system they enjoy now.
- The introduction of this incompatible component is unacceptable.

Minister Berejiklian has stated that this will create great disruption for commuters on the Northern Line.

The NWRL is a much needed project for Western Sydney but it should not be a metro line. The distance is far too long for metro style transport. **The tunnels should be built large enough for current double deck trains to allow its integration into the current rail system.**

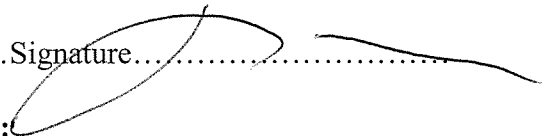

Lodge your objection to EIS2 by December 3 2012.

Name & Address..... *Ryan Philippe*
..... *99A Malton Road, Beecroft 2119*

Application number SSI-5414

A brief statement (in support of your objection to the proposal)

.....
I find it outrageous that this government could consider
destroying an existing functional rail line to deal with a new
incompatible component. I recently moved to Beecroft specifically for
ease of transport for my wife + kids. 3 changes would mean that
Your reason(s) (for objecting to the proposal) *driving or bus (M2) would be preferable.*
Unacceptable commute time. Impracticable for families
and negative impact to house prices.
