

On the 29 October 2012 the NSW Government released the Second Environmental Impact Statement (EIS2) for the North West Rail Link (NWRL)

How it will affect local residents:

- Passengers travelling on the Northern Line from Beecroft and Cheltenham, who currently enjoy a direct run into the city on one train, will be forced to **change at Epping** for a single deck train. At Chatswood, they will have to will then need to **change again** back to a double deck train to get to the CBD.
- That means having to get **three trains** into the city increasing travel time by 15 minutes rather than the one seamless system they enjoy now.
- The introduction of this incompatible component is unacceptable.

Minister Berejiklian has stated that this will create great disruption for commuters on the Northern Line.

The NWRL is a much needed project for Western Sydney but it should not be a metro line. The distance is far too long for metro style transport. **The tunnels should be built large enough for current double deck trains to allow its integration into the current rail system.**

Lodge your objection to EIS2 by December 3 2012.

Application number SSI-5414

A brief statement (in support of your objection to the proposal)

I love current northern line with trains every 15 min in peak hrs.  
I strongly object to the proposed changes to rail system  
that would require me to change trains twice to get to the  
city where I work. I commute daily & stand to lose

Your reason(s) (for objecting to the proposal) 2 x 15 x 5 x 52 minutes of my  
life every year.

Improvement should mean faster, less congested &  
easier transport. I find it hard to understand how  
such backward proposal could be passed by any, no  
matter how incompetent government. Signature [Signature]
