Attention Director, Infrastructure Projects

EIS 2 Application SSI-5414

We do not support this proposal due to:

The suggested access point to the railway station being Carrington Road, close to residential streets which are currently reasonably quiet and free of commuter parking issues. The inevitable overspill of commuter parking into the neighbouring residential streets causing disruption, noise issues, problems accessing our streets for residents, school buses, kerbside obstruction of recycling and garbage collections would severely affect our way of life and wellbeing. We initially supported the railway on the understanding access would be from Showground Road.

Regards,

Elizabeth, Paul, Warren and Lara Millar
