Name: Mary Abraham  
Address; 14 Elderberry Place, Cherrybrook, 2126 NSW  
Name of application ; North West Rail link, EIS 2 Submission  
Application number : SSI-5414

I do not have sufficient details to either support or object to the proposal. From the small 2 page note that I got while waiting for the train in Pennant Hills did not give me sufficient information to make a decision. However, I will object to the proposal should the current direct line to the city will be impacted. For years I am able to go to the city without having to change trains - first via Strathfield and after the epping-chatswood line was operational then via Chatswood. If I have to change in Epping or Chatswood to get to the city in the future, then it will not be convenient and would disrupt my daily commute and the time taken to get to my place of work in the city. To change and be with thousands of other waiting for the connecting train to the city would be disruptive to the smooth travel I experience every day. I would definitely not support the proposal if this happens.

I am a regular train user and have no complaints in the running of the Northern line to date. So the plan will impact my opinion in the future if I have to change trains to get to my place of work in the city

Thanks

Regards  
Mary
