---

Attention: Director, Infrastructure Projects

This is for application number (SSI-5414).

Regarding the EIS2 for North West Rail Link, I am strongly against the proposal which will greatly disrupt passengers from Normanhurst to Epping want to go to the city.

It makes no sense to use tax payer's money to build a service not to benefit the people, but to add inconvenience to people, and damage the existing good services.

Please don't disrupt the current Northern line service that benefit those people to go to work in the city (which contribute the money to make your current project).

Regards
