**Subject:** Use of Robert Road for North-West Rail Link

Director of Infrastructure Projects

Dear Sir

I have been living on Robert Road for 26 years. Since the conversion of the Castle Hill Rd intersection to left turn only, some years ago, the low-traffic nature of Robert Road has attracted residents who specifically looking for a place with less traffic danger. As such, the whole of the Robert Road area, including the streets which are continuous is an area where a high number of young families have their homes. To convert this quiet neighbourhood into a high traffic thoroughfare would be extremely inappropriate for the residents and would detrimentally impact the safety of the area. Robert Road is not an appropriate option for major traffic flow related to The North-West Rail Link.

Your sincerely,

Carla Ghisla  
47 Robert Road, Cherrybrook
