

On the 29 October 2012 the NSW Government released the Second Environmental Impact Statement (EIS2) for the North West Rail Link (NWRL)

How it will affect local residents:

- Passengers travelling on the Northern Line from Beecroft and Cheltenham, who currently enjoy a direct run into the city on one train, will be forced to **change at Epping** for a single deck train. At Chatswood, they will have to will then need to **change again** back to a double deck train to get to the CBD.
- That means having to get **three trains** into the city increasing travel time by 15 minutes rather than the one seamless system they enjoy now.
- The introduction of this incompatible component is unacceptable.

Minister Berejiklian has stated that this will create great disruption for commuters on the Northern Line.

The NWRL is a much needed project for Western Sydney but it should not be a metro line. The distance is far too long for metro style transport. **The tunnels should be built large enough for current double deck trains to allow its integration into the current rail system.**

Lodge your objection to EIS2 by December 3 2012.

Name & Address... IAN MAGINNIS
88 ORATAVA AVENUE, WEST PENNANT HILLS, NSW, 2125

Application number SSI-5414

A brief statement (in support of your objection to the proposal)

The existing service, is an excellent service, that is regular,
timely and efficient. Its design + implementation has been
extremely successful + meets the needs of the Northern
line commuters. Any loss of this efficient service
would be a detriment to the excellent design + implementation
of this service

Your reason(s) (for objecting to the proposal)

There seems to be no logical reason to reduce the efficiency
of an existing excellent service, that was designed to
meet the needs of the Northern suburbs commuters. To
implement, a new + needed service, but at the expense
of an existing efficient service is short sighted + inefficient.
Please do not repeat the disaster of the
Lane Cove tunnel at the expense of the Epping Highway.
