---

Hi Natasha,

**TG Reference Number: 2018-330**

**Springdale Solar (SSD8703) – Exhibition**

**Lot 209 in DP 754908, Lot 182 in DP 754908, Lot 209 in DP 754908, Lot 202 in DP 754908**

Thank you for consulting with TransGrid regarding the abovementioned proposal.

We can confirm the proponent is in discussions with TransGrid as the Transmission Network Service Provider to develop their proposed project. They are in the process of working through the connection process, in accordance with the National Electricity Rules and TransGrid's requirements.

The proposed design of the substation and switchbay for the Springdale farm is consistent with the descriptions in the Environmental Impact Statement on display with NSW Planning and Environment. However, it is unclear in the EIS that the transmission line works is included in the scope of works. It may be referred to as "associated infrastructure". To clarify its inclusion, it is requested that the submissions report clarifies that the transmission line works includes replacement of existing poles with new structures and guy wires, as well as like for like replacement of conductors and earth wire.

For preliminary advice, please find attached a copy of *TransGrid's Easement Guidelines for Third Party Development (V10)*. Please note these guidelines are **not** an exhaustive list and should there be any uncertainty further consultation with TransGrid is required.

If you have any questions, please do not hesitate to contact me.

Kind regards,

**Michael Platt**  
*Development Assessment and Control Officer* | Network Planning and Operations
