This is a submission to the Berrima Rail Project EIS. SSD7171

I object to this project and recommend that it be rejected.

- At present Noise from freight trains in Moss Vale can be high, especially with braking: metal on metal.
- To increase the already high traffic of freight trains with coal loaded trains would cause an unacceptable Noise level.
- Passenger trains are impacted adversely at present with delays common due to freight trains. How will timetables for passenger trains be achieved?
- What impacts will coal laden trucks/trains have on all passenger trains using the South/Southern Highlands line which includes to/from Melbourne.
- How would coal trains using a line to Port Kembla impact on high speed trains from Sydney-Melbourne.

I ask the Government to reject this project
