

While the following 10 concerns should be concern enough for this project to be TERMINATED, maybe there is one concern that you as a politician will resonate with and that my friend is the BALLOT BOX – there is an undeniable ground swell of support from the average person in the street to STOP CSG in this state – it is clearly time for the State Government to honour the People’s wishes.

We want a healthy environment over the short term, short sighted monetary gains this project may bring

- 1. The Narrabri Gas Project risks precious water sources, including the Great Australian Basin—Australia’s largest groundwater aquifer**
- 2. The Gamilaraay Traditional Custodians are opposed**
- 3. Farmers and other local community reject the project**
- 4. The Narrabri Gas Project has a long history of spills and leaks of toxic CSG water—Santos cannot be trusted to manage the project safely**
- 5. The Pilliga is a haven for threatened wildlife**
- 6. Coal seam gas fuels dangerous climate change**
- 7. Human health is compromised by coal seam gas**
- 8. The nation’s premier optical astronomical observatory is at risk**
- 9. Thousands of tonnes of salt waste will result from the project**
- 10. Risk of fires would increase throughout the Pilliga’s tinder-box conditions**
