This is a submission to the Narrabri Gas EIS.

I wish to voice my objection to the Santos Narrabri Gas project in the Pilliga.

I believe this project will put the underground water in jepody and therefor the agricultural industry, which is the economic backbone of the Narrabri Shire. We need food before gas .

The destruction caused by this industry is unbelievable not only to soil and water but to peoples lives and agriculture.

96% of people of people surveyed do not want this industry, they are the people who should matter as they are the farmers and land owners.

The only people who want this project to go ahead are stakeholders, either work for Santos, are contractors or have been bought by the handouts to sporting clubs ect.

I am deeply concerned as I own a cattle grazing property aproximately 15 klm from this project.

These are some of the reasons for my objection to this project.

A handwritten signature in cursive script, appearing to read 'G. Campey', written in black ink.
