This is a submission to the Narrabri Gas Project EIS.

I strongly object to this project and want it rejected.

I don't believe it is worth risking the future of agricultural enterprises and rural communities across NSW by drilling through a recharge aquifer of the Great Artesian Basin.

If approved there would be extraction of over 35 billion litres of salt laden water which would then be treated and would generate up to 50,000 tonnes of salt waste for which there is no safe disposal plan.

I urge you to listen to the people of rural NSW and reject this project.

Yours faithfully

Lisa Doolan
