To: the NSW Department of Planning and Environment

This is a submission to the Narrabri Gas EIS

I object to this project because it will extract large amounts of toxic groundwater which in turn will result in large amounts of salt being produced with no viable solution.

The project will also destroy parts of the ~~Abor~~ local Aboriginal community, their sacred sites, as their natural ~~to~~ sites and further exploit the pristine land.

Santos sucks and only cares about profit margins. Lock the gate to gas companies trying to exploit an environment which should be shared by all.

Sincerely

Andrew Ngeh
