This is a submission to the Santos Narrabri Gas EIS.

I object to this project and recommend that it be rejected.

The potential for this project to eventually effect the waters of the Great Artesian Basin should be taken into account. Concrete and steel eventually fail. I would like to see if any insurance company would insure against contamination of ground water at any time in the future. Does Santos hold any insurance against this happening and if the project is sold to another company whose is ultimately responsible. This project should not proceed under any circumstances. You can not drink gas!

I ask the Government to reject this project and make the Great Artesian Basin recharge off-limits to gas mining.

Signed,
