RE: Support for the Orange Grove Solar (SSD 8882)

Dear Ms. Bandaruk,

I am sending this to personally express my support for the Orange Grove Solar project (SSD 8882). I believe that this area within N.S.W. is becoming more innovative and sustainable each year, and with such an increasing population within the region, this project would enable a new and fresh venture for employment and education. As long as respect for the land, the environment and the people/generations who work on it is upheld and expressed, then I cannot see any negatives to the beginning of this development.

Renewable energy is the future, and I believe it is not occurring fast enough, therefore this project will be apart of a crucial catalyst in the next steps into an innovative future for not only the Gunnedah community but also it's surrounding regions.

Kind regards,
Kate Spencer

Resident of Tamworth, NSW
