Applicant — Hanson's Construction Materials Pty Ltd

To whom it may concern,

I am an 8 year old year 3 student and would like to express my concerns about the Glebe Island Hansons Construction proposal.

I have proof that the proposal from Hansons should not be approved. There are three main reasons why the Hansons warehouse should not be constructed. These reasons are that there would be too much noise from ship's engines both day and night, there would be too much dust and sand blown to us polluting the environment and us and there would be increased traffic.

To start off with, there would be too much noise from ship's engines. Too make it worse, the letters that have been sent to us have clearly said that the warehouse will be running 24/7!! This would surely effect me and my family's quality of sleep! But this would also be a problem in the day! As I mentioned earlier, I am a year three student and have homework to get done. The loud noise from the ship will disrupt my learning. I mean, would you like to be constantly hearing noise from your house??

Next, I know that there will be a large amount of dust and sand blown from the warehouse. This would pollute not only us but also the environment. Too much sand would be a big problem for the environment. For dust, well this would be polluting the air. Especially on windy days would dust and sand be blown to our houses and around.

---

Finally, there would be increased traffic on the roads. I need to get to school and my family has things to do. I do not want to be late for school and I'm not planning to be late for anything else. From many of the Hanson trucks the traffic will not be so good.

In conclusion, for the concerns I have expressed, I hope I have given enough reasons to why the Hanson warehouse should not be approved.

Yours faithfully,

Kayla Lu Balban
