Council Area Inner West  
Consent Authority Minister for Planning

I were shocked when I heard the proposal to build a Cement factory on Glebe Island  
because it will totally destroyed my life at Evovle.

1. Noise and vibration from plant,trucks, ship make our environment change to busy  
Industrial Port, and most importantly it's just 30 Meters away from my apartment.
2. Dust from trucks,ships will severely influence our health, especially our lungs.
3. 24 hours operation totally destroys our residential life .
4. New facility will change people's life and devalue the properties in Pymont  
community , especially sharply devalue my apartment in Evovle .

I want to ask what's the initial purpose of our government to develop Pymont from  
demolished industrial area to residential one. After the residential community  
successfully built after 18 years, this proposal will change Pymont community back  
to industrial one and it's absolutely not against the initial purpose of building new  
Pymont. The government should not only consider economic interests but also  
people's life and health .To Maintain and improve the living environment should be  
the government 's goal but not economic interest especially when any proposal  
sacrificing people's health.

Besides, I never see Industrial facility in very down town in any other big cities in the  
world . Only in Sydney we could see cement factory in Glebe , a very important place  
on the other side of harbour bridge. Sydney is always regarded as big international  
city but these cement factory or proposal of building multi-user facility are pulling a  
modern city to a outdated industrial city of early last century.

If this proposal passed , that will make me very depressed and I will be forced to  
see both psychological and physical doctors.I'm planning to live at my apartment for  
rest of my life, but it will totally destroy my dream if this proposal passed.
