Attn: Executive Director, Resource Assessments Department of Planning and
Environment
GPO Box 39
Sydney NSW 2001

This is a submission to the Hume Coal Project EIS. SSD7172

I object to this project and recommend that it be rejected.

Mining water released into Oldbury
Creek will effect the health of the
water and what lives in the creek.
Pumping out our groundwater will
lower the groundwater table, so the
roots of trees cannot reach the water
table and will die, so it will create
a desert landscape. Also the
farmers pumps don't pump water any more.
They have to spend a lot of money to
make the pumps working again.

I don't want this most beautiful
part of N.S.W getting in the hands of
people who want to destroy it

I ask the Government to reject this project
